

The Professionals Choice

Need to locate or avoid buried pipes or cables ?

The **TOMCAT 2** is a full function industry standard locator.

Better by design, The **TOMCAT 2** is rugged, lightweight & packed full of features including a detachable speaker held close to the ear for use in noisy conditions. Fingertip controls adjust the sensitivity & rapid switching between the **TOMCAT 2's** three operating modes.

The **TOMCAT 2** is used to assist in the location of buried pipes & cables offering three modes of detection.

Power mode:- Locates live cables radiating a detectable signal.

Radio mode:- Locates buried metallic conductors carrying a detectable vlf signal.

Genny mode:- Locates buried metallic conductors carrying a detectable signal by induction or connection using the **SIGEN 2**.

The **SIGEN 2** is a full function, industry standard transmitter operating on 33kHz, the **SIGEN 2** applies a signal either by induction or connection & comes supplied as standard with connection leads, earth stake & a 3 pin plug connector to enable live cable connection via a mains socket.

Best of all the **TOMCAT 2** & **SIGEN 2** are completely compatible with other makes of location equipment operating at 33kHz.
